Persian, known locally as Farsi, is the official language of modern day Iran and parts of Afghanistan and the central Asian republic of Tajikstan, but historically it was a more widely understood language in an area ranging from the Middle East to India. Significant populations in other Persian Gulf countries also speak Persian. The difference between Dari Persian, mainly spoken in Afghanistan, and Farsi has been compared to the difference between European and Canadian French.

Persian is written in the Arabic script but it belongs to the Indo-European family of languages so speakers of European languages should find learning Persian relatively easy to begin with. It is remarkably simple in terms of formal grammar - no gender, no noun inflection and no irregularities in verbal conjugation. 'Teach Yourself Modern Persian (Farsi)' is designed for the true beginner and self-access learner, starting from the basics of learning the Persian alphabet. By the end of the course you'll be able to build complex sentences and communicate in a wide range of everyday situations. There's plenty of practice of each point as it is introduced and the accompanying CDs will help you to improve your speaking and listening skills. The accompanying CDs are available separately (0340 80267 7) or in a pack with the book (0340 80266 9). Comprehensive - covers a wide range of topics and language structures for learners who want to progress quickly beyond the basics to a level where they can communicate with confidence Practice exercises in every unit helps you remember what you've learnt This course will appeal to complete beginners as well as those who want to refresh existing knowledge There's a special section at the start of the book to help you master the script.
